

SoundTube STNet Release notes

Product V4.0.x Release Date: 10/2018

MCU V 1.11 Release Date: 10/2018

Feature enhancements:

- Release Atterotech uniFY support for SoundTube STNet Speakers.
- All updates now in one Smart Firmware update file (sfu file).
- Support for Dante Domain Manager.
- Support added for AES67 on speakers with Ultimo UXT chips.
- Changed Dante name from DNA to STNET

V3.10 Release Date: 10/2017

Feature enhancements:

- Dante lock functionality is now supported for Dante parameters.

Corrected Issues:

- Prior to this update, this product would stop receiving audio from another Dante device if left running sometime between 7-48 days. This firmware update resolves this issue.
